Research Summary

Researchers conducted web searches using the Google search engine on a computer cleared of cookies and caches, and not signed into a google account. They searched first by the county name, using the terms “‘X’ County, Texas Guided fishing” and then searched by a community name, using the terms “‘X’, Texas Guided Fishing”. They took the top results for each search, stopping when they reached 12 or when the search page returned no relevant results. There was a maximum possible 24 results from each county – 12 from a county search and 12 from a community search. These results come from a standard internet search and may not represent all of the guides operating in the county. The results reflect how well the guide businesses have positioned their websites to appear in standard searches.

Relevant results were individual fishing guides, or guided fishing companies. The “Standard Product” used for this research was a Half-Day Guided Fishing Trip for 2 where Red Drum was a target species fish. Data was also taken for non-standard product results, such as Full Day Guided Fishing Trips and Trips for more than 2 people. The results are differentiated by creating two categories “Total Results” and “Standard-Product Only Results”.

Researches took information on the prices of fishing packages, whether or not they offered the 8 most commonly offered amenities, and where the guide was located.

Fishing Economics Data

The 2011 National Survey of Fishing, Hunting, and Wildlife-Associated Recreation shows that $41.8 billion dollars are spent annually on recreational fishing. This means that Texas, with their $4.2 billion in spending on fishing account for approximately 10 percent of the United States’ total income from fishing.

Texas places second overall in spending on recreational fishing, after Florida. Recreational fishing in Texas totaled $4.2 billion in spending, supported 59,000 jobs, had $392 million in state tax revenue, and $482 million in federal tax revenue. Hunting and Fishing: Bright stars of the American economy

The National Shooting Sports Foundation (NSSF) states that anglers spend $1.1 billion dollars per year on bait alone. They spend $5.3 billion on equipment, including rods, reels, boats, and boat accessories, $4.3 billion on food, and $2 billion on lodging.

According to Daniel Nu of outdoorhub.com, the sportfishing industry is an economic powerhouse in Texas. He states that freshwater anglers generate more than $981 million in retail sales in Texas annually while over 750,000 saltwater anglers have an economic impact of over $1.7 billion. Fishing News: Texas A&M to Create New Sportfish, Conservation Research Center

Recreational Fishing: In 2009, over 2.8 million recreational anglers took 22 million fishing trips in the Gulf of Mexico Region. Almost 90% of these anglers were residents of a regional coastal county. Of the total fishing trips taken, 59% were taken from a private or rental boat and another 37% were shore-based. Spotted seatrout were the most frequently caught species or species group with 29 million fish
caught in 2009, and represented 47% of total fish caught in the region. Of the spotted seatrout caught, 57% of them were released rather than harvested.

The Tables below highlight recreational fishing impacts from the report.
